## Summary

I am a Computer Science undergraduate with keen interest in software engineering and Artificial Intelligence/Machine Learning. Currently building a strong base in data structures, backend systems, and problem solving, with hands-on internship experience in usage metering, quota gating, and idempotent billing pipelines.

## Skills

- Python ●●●●○
- C++ ●●●○○
- Git & GitHub ●●●●○
- JavaScript & TS (Learning) ●●○○○

## Languages

English

Hindi

## Experience

### Backend AI Engineer Intern

**FlyRank AI**

- **Idempotent Event Ingestion:** Designed header-based request deduplication using `X-Idempotency-Key`, preventing duplicate charge events across network replays and client retries.
- **Usage Quota Enforcement:** Implemented monthly quota enforcement across Free and Pro tiers, tracking API invocations and token volume with immediate HTTP 429 threshold responses.
- **Integer-Cent Precision:** Standardized token and request pricing models on integer-cent arithmetic to eliminate floating-point rounding discrepancies.
- **Webhook Reconciliation:** Built Stripe webhook verification and background reconciliation workers to synchronize subscription states with PostgreSQL.

*Tech: Node.js · TypeScript · PostgreSQL · Vitest · Docker*

## Education

### Bachelor of Technology (B.Tech) in Computer Science

IILM University
2025 – Present | Greater Noida, India

### Senior Secondary (Class XII)

Sarvottam International School
2024 – 2025 | Greater Noida, India

### Secondary (Class X)

Sarvottam International School
2022 – 2023 | Greater Noida, India

## Certificates

• 5-Day AI Agents Intensive Course with Google
